## **PART- 1. BEFORE USING THE APPLIANCE**

### **General warnings**

**WARNING:** Keep ventilation openings, in the appliance enclosure or in the built-in structure, clear of obstruction.

**WARNING:** Do not use mechanical devices or other means to accelerate the defrosting process, other than those recommended by the manufacturer.

**WARNING:** Do not use electrical appliances inside the food storage compartments of the appliance, unless they are of the type recommended by the manufacturer.

**WARNING:** Do not damage the refrigerant circuit.

**WARNING:** To avoid a hazard due to the instability of the appliance, it must be fixed in accordance with the instructions.

**WARNING:** When positioning the appliance, ensure the supply cord is not trapped or damaged.

**WARNING:** Do not locate multiple portable socket-outlets or portable power supplies at the rear of the appliance.

Symbol ISO 7010 W021

Warning; Risk of fire / flammable materials

- If your appliance uses R600a as a refrigerant – you can learn this information from the label on the cooler- you should be careful during shipment and installation to prevent your appliance's cooler elements from being damaged. Although R600a is an environmentally friendly and natural gas. As it is explosive, in the event of a leak due to damage to the cooler elements, move your fridge from open flame or heat sources and ventilate the room

- where the appliance is located for a few minutes.
- While carrying and positioning the fridge, do not damage the cooler gas circuit.
  - Do not store explosive substances such as aerosol cans with a flammable propellant in this appliance.
  - This appliance is intended to be used in household and similar applications such as;
    - staff kitchen areas in shops, offices and other working environments
    - farm houses and by clients in hotels, motels and other residential type environments
    - bed and breakfast type environments;
    - catering and similar non-retail applications
  - If the socket does not match the refrigerator plug, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.
  - A specially grounded plug has been connected to the power cable of your refrigerator. This plug should be used with a specially grounded socket of 16 amperes. If there is no such socket in your house, please have it installed by an authorized electrician.
  - This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazard involved. Children shall not play with the appliance. Cleaning and user maintenance, shall not be made by children without supervision.
  - Children aged from 3 to 8 years are allowed to load and

unload refrigerating appliances. Children are not expected to perform cleaning or user maintenance of the appliance, very young children (0-3 years old) are not expected to use appliances, young children (3-8 years old) are not expected to use appliances safely unless continuous supervision is given, older children (8-14 years old) and vulnerable people can use appliances safely after they have been given appropriate supervision or instruction concerning use of the appliance. Very vulnerable people are not expected to use appliances safely unless continuous supervision is given.

- If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similar qualified persons in order to avoid a hazard.
- This appliance is not intended for use at altitudes exceeding 2000 m.

**To avoid contamination of food, please respect the following instructions:**

- Opening the door for long periods can cause a significant increase of the temperature in the compartments of the appliance.
- Clean regularly surfaces that can come in contact with food and accessible drainage systems.
- Store raw meat and fish in suitable containers in the refrigerator, so that it is not in contact with or drip onto other food.
- Two-star frozen-food compartments are suitable for storing pre-frozen food, storing or making ice cream and making ice cubes.

- One-, two- and three-star compartments are not suitable for the freezing of fresh food.
- If the refrigerating appliance is left empty for long periods, switch off, defrost, clean, dry, and leave the door open to prevent mould developing within the appliance.

**The water dispenser is available**

- Clean water tanks if they have not been used for 48 h; flush the water system connected to a water supply if water has not been drawn for 5 days.

## Old and out-of-order fridges

- If your old fridge has a lock, break or remove the lock before discarding it, because children may get trapped inside it and may cause an accident.

- Old fridges and freezers contain isolation material and refrigerant with CFC. Therefore, take care not to harm environment when you are discarding your old fridges.

Please ask your municipal authority about the disposal of the WEEE for the reuse, recycle and recovery purposes.

### Notes:

- Please read the instruction manual carefully before installing and using your appliance.  
**We are not responsible for the damage occurred due to misuse.**
- Follow all instructions on your appliance and instruction manual, and keep this manual in a safe place to resolve the problems that may occur in the future.
- This appliance is produced to be used in homes and it can only be used in domestic environments and for the specified purposes. It is not suitable for commercial or common use. Such use will cause the guarantee of the appliance to be cancelled and our company will not be responsible for the losses to be occurred.
- This appliance is produced to be used in houses and it is only suitable for cooling / storing foods. It is not suitable for commercial or common use and/or for storing substances except for food. Our company is not responsible for the losses to be occurred in the contrary case.

## Safety warnings

- Do not use multiple receptacles or extension cord.
- Do not plug in damaged, torn or old plugs.
- Do not pull, bend or damage the cord.

- This appliance is designed for use by adults, do not allow children to play with the appliance or let them hang off the door.
- Do not plug-in or out the plug from the receptacle with wet hands to prevent electrocution!
- Do not place glass bottles or beverage cans in the freezer department. Bottles or cans may explode.
- Do not place explosive or flammable material in your fridge for your safety. Place drinks with higher alcohol amount vertically and by closing their necks tightly in the fridge department.
- When taking ice made in the freezer department, do not touch it, ice may cause ice burns and/or cuts.
- Do not touch frozen goods with wet hands! Do not eat ice-cream and ice cubes immediately after you have taken them out of the freezer department!

- Do not re-freeze frozen goods after they have melted. This may cause health issues like food poisoning.
- Do not cover the body or top of fridge with lace. This affects the performance of your fridge.
- Fix the accessories in the fridge during transportation to prevent damage to accessories.
- Do not use plug adapter

## Installing and operating your fridge

*Before starting to use your fridge, you should pay attention to the following points:*

- Operating voltage for your fridge is 220-240 V at 50Hz.
- We do not take the responsibility of the damages that occur due to ungrounded usage.
- Place your fridge in a place that it would not be exposed to direct sunlight.
- Your appliance should be at least 50 cm away from stoves, Gas ovens and heater cores, and should be at least 5 cm away from electrical ovens.
- Your fridge should never be used outdoors or left under the rain.
- When your fridge is placed next to a deep freezer, there should be at least 2 cm between them to prevent humidity on the outer surface.
- Do not place anything on your fridge, and install your fridge in a suitable place so that at least 15 cm is available on the upper side.
- The adjustable front legs should be adjusted to make sure your appliance is level and stable. You can adjust the legs by turning them clockwise (or in the opposite direction). This should be done before placing food in the fridge.
- Before using your fridge, wipe all parts back with warm water added with a tea spoonful of sodium bicarbonate, and then rinse with clean water and dry. Place all parts after cleaning.
- Install the plastic distance guide (the part with black vanes at the rear) by turning it 90° as shown in the figure to prevent the condenser from touching the wall.
- Refrigerator should be placed against a wall with a free distance not exceeding 75 mm.

## Before Using your Fridge

- When it is operated for the first time or after transportation, keep your fridge in the upright position for 3 hours and plug it on to allow efficient operation. Otherwise, you may damage the compressor.
- Your fridge may have a smell when it is operated for the first time; the smell will fade away when your fridge starts to cool.

## PART-2. THE VARIOUS FUNCTION AND POSSIBILITIES

### Thermostat Setting

Thermostat automatically regulates the inside temperature of the refrigerator compartment and freezer compartment. By rotating the knob from position 1. to 5., colder temperatures can be obtained.

Important note: Do not try to rotate knob beyond 1 position it will stop your appliance.

- For short-term storage of food in the freezer compartment, you can set the knob between minimum and medium position.(1-3)
- For long-term storage of food in the freezer compartment, you can set knob medium position.(3-4)

**Note that; the ambient temperature, temperature of the freshly stored food and how often the door is opened, affects the temperature in the refrigerator compartment. If required, change the temperature setting.**

*The freezer\*\*\*\* of the refrigerator can cool up to -18°C and more.*

*The freezer\*\* of the refrigerator can cool up to -12°C and more.*

### Warnings about Temperature Adjustments

- It is not recommended that you operate your fridge in environments colder than 10°C in terms of its efficiency.
- Temperature adjustments should be made according to the frequency of door openings and the quantity of food kept inside the fridge.
- Your fridge should be operated up to 24 hours according to the ambient temperature without interruption after being plugged in to be completely cooled. Do not open doors of your fridge frequently and do not place much food inside it in this period.
- A 5 minute delaying function is applied to prevent damage to the compressor of your fridge, when you take the plug off and then plug it on again to operate it or when an energy breakdown occurs. Your fridge will start to operate normally after 5 minutes.
- Your fridge is designed to operate in the ambient temperature intervals stated in the standards, according to the climate class stated in the information label. We do not recommend operating your fridge out of stated temperatures value limits in terms of cooling effectiveness.

- This appliance is designed for use at an ambient temperature within the 10°C - 43°C range.

Climate Class	Ambient Temperature (°C)
<b>T</b>	Between 16 and 43 (°C)
<b>ST</b>	Between 16 and 38 (°C)
<b>N</b>	Between 16 and 32 (°C)
<b>SN</b>	Between 10 and 32 (°C)

**Climate class and meaning:**

**T (tropical):** This refrigerating

appliance is intended to be used at ambient temperatures ranging from 16 °C to 43 °C.

**ST (subtropical):** This refrigerating appliance is intended to be used at ambient temperatures ranging from 16 °C to 38 °C.

**N (temperate):** This refrigerating appliance is intended to be used at ambient temperatures ranging from 16 °C to 32 °C.

**SN (extended temperate):** This refrigerating appliance is intended to be used at ambient temperatures ranging from 10 °C to 32 °C.

## Accessories

### “Door Open” Indicator;

The « Door Open » indicator on the handle shows whether the door has closed properly or whether it is still open.

- If the indicator is red, the door is still open.
- If the indicator is white, the door is properly closed.
- Observe that the freezer's door should always be kept closed. This will prevent food products from defrosting; it will avoid heavy ice and frost build-up inside the freezer and an unnecessary increase in energy consumption.

### Making Ice cubes;

#### Ice tray ;

- Fill the ice tray with water and place in freezer compartment.
- After the water completely turned into ice, you can twist the tray as shown below to get the ice cube.

### Plastic scraper

After a period of time frost will build up in certain areas in the freezer compartment. The frost accumulated in the freezer should be removed periodically. Use the plastic scraper provided if necessary. Do not use sharp metal objects for this operation. They could puncture the refrigerator circuit and cause irreparable damage to the unit.

*All written and visual descriptions in the accessories may vary according to the appliance model.*

## **PART- 3. FOOD STORAGE IN THE APPLIANCE**

### **Refrigerator compartment**

- The refrigerator compartment is used for storing fresh food for a few days.
- Do not place food in direct contact with the rear wall of the refrigerator compartment. Leave some space around food to allow circulation of air.
- Do not place hot food or evaporating liquid in the refrigerator.
- Always store food in closed containers or wrapped.
- To reduce humidity and avoid formation of frost, never place liquids in unsealed containers in the refrigerator.
- Meat of all types, wrapped in packages, is recommended to be placed on the glass shelf just above the vegetable bin, where the air is colder.
- You can put fruit and vegetables into the crisper without packaging.
- To avoid cold air escaping, try not to open the door too often, and not leave the door open for a long time.
- For normal working conditions, it will be sufficient to adjust the temperature setting of your refrigerator to +4 °C.
- The temperature of the fridge compartment should be in the range of 0-8 °C, fresh foods below 0 °C are iced and rotted, bacterial load increases above 8 °C, and spoils.
- Do not put hot food in the refrigerator immediately, wait for the temperature to pass outside. Hot foods increase the degree of your refrigerator and cause food poisoning and unnecessary spoiling of the food.
- Meat, fish, etc. should be store in the chiller compartment of the food, and the vegetable compartment is preferred for vegetables. (if available)
- To prevent cross contamination, meat products and fruit vegetables are not stored together.
- Foods should be placed in the refrigerator in closed containers or covered to prevent moisture and odors.

**NOTE:** Potatoes, onions and garlic should not be stored in the refrigerator.

### **Freezer compartment**

The freezer compartment is used for freezing fresh food and for storing frozen food for the period of time indicated on packaging, and for making ice cubes.

- When freezing fresh food, wrap and seal the food properly; the packaging should be air tight and shouldn't leak. Special freezer bags, aluminum foil (heavy grade, if in doubt double wrap), polythene bags and plastic containers are ideal.
- While freezing fresh foods (i.e meat,fish and mincemeat), divide them in parts you will use in one time.
- Once the unit has been defrosted replace the foods into freezer and remember to consume them in as short period of time.

- Do not allow the fresh food to be frozen to come into contact with the already frozen food.
- Always mark the date and the content on the pack and do not exceed the stated storage time.
- In case of a power failure or malfunction, the freezer compartment will maintain a sufficiently low temperature for food storage. However, avoid opening the freezer door to slow down the temperature rise within the freezer compartment.
- Never place warm food in the freezer compartment.
- When purchasing and storing frozen food products, ensure that the packaging is not damaged.
- The storage time and the recommended temperature for storing frozen food is indicated on the packaging. For storing and using, follow the manufacturer's instructions. If no information is provided, food should not be stored for more than 3 months.
- Place frozen food in the freezer compartment as soon as possible after buying it.
- Once the food has thawed, it must not be refrozen; you must cook it as quickly as possible in order to consume or to freeze once again.

**Not that;** if you want to open again immediately after closing the freezer door, it will not be opened easily. It's quite normal! After reaching equilibrium condition, the door will be opened easily.

**Important note:**

- Frozen foods, when thawed, should be cooked just like fresh foods. If they are not cooked after being thawed they must NEVER be re-frozen.
- The taste of some spices found in cooked dishes (anise, basilica, watercress, vinegar, assorted spices, ginger, garlic, onion, mustard, thyme, marjoram, black pepper, etc.) changes and they assume a strong taste when they are stored for a long period. Therefore, the frozen food should be added little amount of spices or the desired spice should be added after the food has been thawed.
- The storage period of food is dependent on the oil used. The suitable oils are margarine, calf fat, olive oil and butter and the unsuitable oils are peanut oil and pig fat.
- The food in liquid form should be frozen in plastic cups and the other food should be frozen in plastic folios or bags.

## PART- 4. CLEANING AND MAINTENANCE

- Disconnect unit from the power supply before cleaning.

- Do not clean the appliance by pouring water.

- The refrigerator compartment should be cleaned periodically using a solution of bicarbonate of soda and lukewarm water.

- Clean the accessories separately with soap and water. Do not clean them in the washing machine.

- Do not use abrasive products, detergents or soaps. After washing, rinse with clean water and dry carefully. When the cleaning operations have been completed reconnect the plug of the unit with dry hands.

- You should clean the condenser with broom at least twice a year in order to provide energy saving and increase the productivity.

## Defrosting

### For fridge compartment

- Defrosting occurs automatically in refrigerator compartment during operation ; the defrost water is collected by the evaporating tray and evaporates automatically.
- The evaporating tray and the defrost water drain hole should be cleaned periodically with defrost drain plug to prevent the water from collecting on the bottom of the refrigerator instead of flowing out.
- You can also pour ½ glass of the water to drain hole to clean inside.

### For freezer compartment;

The frost, accumulated in the freezer compartment, should be removed periodically. The freezer compartment should be cleaned in the way as the refrigerator compartment, with the defrost operations of the compartment at least twice a year.

### For this;

- The day before you defrost, set the thermostat dial to 5. position to freeze the foods completely.
- During defrosting, frozen foods should be wrapped in several layers of paper and kept in a cool place. The inevitable rise in temperature will shorten their storage life. Remember to use these foods within a relatively short period of time.
- Switch the refrigerator off at the socket outlet and pull the main plug
- Leave the door open and to accelerate the defrosting process one or more basins of warm water can be placed in the freezer compartment.
- Dry the inside of the unit and water tray, refit the tray plug and set the thermostat knob to 5 position.

## Replacing The Light Bulb

When replacing the light of the refrigerator compartment;

1. Unplug the unit from the power supply,
2. Press the hooks on the sides of the light cover top and remove the light cover
3. Change the present light bulb with a new one of not more than 15 W.
4. Replace the light cover and after waiting 5 minutes plug the unit.

## Replacing LED Lighting

If your refrigerator has LED lighting contact the help desk as this should be changed by authorized personnel only.

## **PART- 5.** TRANSPORTATION AND CHANGING OF INSTALLATION POSITION

### Transportation and changing of installation position

- Original package and foam may be kept for re-transportation (optionally).
- You should fasten your fridge with thick package, bands or strong cords and follow the instructions for transportation on the package for re-transportation.
- Remove movable parts (shelves, accessories, vegetable bins etc.) or fix them into the fridge against shocks using bands during re-positioning and transportation.

*Carry your fridge in the upright position.*

### Repositioning the door

- It is not possible to change the opening direction of your fridge door, if the door handles on your fridge are installed from the front surface of the door.
- It is possible to change the opening direction of the door on models without any handles.
- If the door opening direction of your fridge may be changed, you should contact the nearest Authorised Service to have the opening direction changed.

## **PART- 6. BEFORE CALLING YOUR AFTER SALES SERVICE**

If your refrigerator is not working properly, it may be a minor problem, therefore check the following, before calling an electrician to save time and money.

### **What to do if your refrigerator does not operate ;**

#### **Check that ;**

- There is no power,
- The general switch in your home is not disconnected ,
- The thermostat setting is on “•” position,
- The socket is not sufficient. To check this, plug in another appliance that you know which is working into the same socket.

### **What to do if your refrigerator performs poorly ;**

#### **Check that ;**

- You have not overloaded the appliance ,
- The doors are closed perfectly ,
- There is no dust on the condenser ,
- There is enough place at the rear and side walls.

### **If there is noise ;**

The cooling gas which circulates in the refrigerator circuit may make a slight noise (bubbling sound) even when the compressor is not running. Do not worry this is quite normal. If these sounds are different check that ;

- The appliance is well levelled ,
- Nothing is touching the rear ,
- The stuffs on the appliance are vibrating.

### **If there is water in the lower part of the refrigerator ;**

#### **Check that ;**

The drain hole for defrost water is not clogged (Use defrost drain plug to clean the drain hole)

### **IMPORTANT NOTES:**

- While power cut, to prevent any compressor problem you should plug out the refrigerator. You should delay plugging in 5 – 10 minutes after you power supply. If you plug out the refrigerator for a reason you should wait at least 5 min to replug. It is important for avoiding damage to refrigerator's components.
- The cooling unit of your refrigerator is hidden in the rear wall. Therefore, water droplets or icing may occur on the rear surface of your fridge due to the operation of the compressor in specified intervals. This is normal. There is no need to perform a defrosting operation unless the icing is excessive.
- If you will not use your fridge for a long time (e.g. in summer holidays), put the thermostat to “•” position. After defrosting, clean your fridge and leave the door open to prevent humidity and smell.
- If the problem persists after you have followed all the instructions above, please consult to the nearest Authorised Service.

- The appliance you have purchased is designed for home type use and can be used only at home and for the stated purposes. It is not suitable for commercial or common use. If the consumer use the appliance in a way that does not comply with these features, we emphasise that the producer and the dealer shall not be responsible for any repair and failure within the guarantee period.

## **Tips for saving energyTips for saving energy**

- 1– Install the appliance in a cool, well ventilated room , but not in direct sunlight and not near heat source (radiator, cooker.. etc). Otherwise use an insulating plate.
- 2– Allow warm food and drinks to cool down outside the appliance.
- 3– When thawing frozen food, place it in the refrigerator compartment. The low temperature of the frozen food will help to cool the refrigerator compartment when it is thawing. So it reduces the energy requirements.
- 4– When placing, drinks and liquids they must be covered. Otherwise humidity increases at the appliance. Therefore the working time gets longer. Also covering drinks and liquids helps preserve the smell and taste.
- 5– When placing food and drinks, open the appliance door as briefly as possible.
- 6– Keep the covers closed of any different temperature compartment in the appliance (crisper, chiller ...etc ).
- 7– Door gasket must be clean and pliable. Replace gaskets if worn.

## PART-7.

## THE PARTS OF THE APPLIANCE AND THE COMPARTMENTS

This appliance is not intended to be used as a built-in appliance.

This presentation is only for information about the parts of the appliance.  
Parts may vary according to the appliance model.

- 1) Freezer compartment
- 2) Thermostat box
- 3) Refrigerator shelf
- 4) Crisper cover (Safety glass\*\*)
- 5) Crisper
- 6) Left & Right feet
- 7) Fix door shelves
- 8) Fix egg shelf
- 9) Ice Tray

### General notes:

**Fresh Food Compartment (Fridge):** Most efficient use of energy is ensured in the configuration with the drawers in the bottom part of the appliance, and shelves evenly distributed, position of door bins does not affect energy consumption.

**Freezer Compartment (Freezer):** Most Efficient use of energy is ensured in the configuration with the drawers and bins are on stock position.

ENG

## CUSTOMER CARE AND SERVICE

Always use original spare parts.

When contacting our Authorised Service Centre, ensure that you have the following data available: Model, Serial Number and Service Index.

The information can be found on the rating plate. Subject to change without notice.

The original spare parts for some specific components are available for a minimum of 7 or 10 years, based on the type of component, from the placing on the market of the last unit of the model.

Visit our website to:

Get User manuals : <https://www.smeg.com/info/download-manuals>

Get Service information : <https://www.smeg.com/services/customer-service>

## DIMENSIONS

Overall dimension, overall space required in use, space required in use – TO BE SPECIFIED CONSIDERING THE PRODUCT

## TECHNICAL DATA

The technical information is situated in the rating plate on the internal side of the appliance and on the energy label.

The QR code on the energy label supplied with the appliance provides a web link to the information related to the performance of the appliance in the EU EPREL database.

Keep the energy label for reference together with the user manual and all other documents provided with this appliance.

It is also possible to find the same information in EPREL using the link <https://eprel.ec.europa.eu> and the model name and product number that you find on the rating plate of the appliance.

See the link [www.theenergylabel.eu](http://www.theenergylabel.eu) for detailed information about the energy label.

## INFORMATION FOR TEST INSTITUTES

Appliance for any EcoDesign verification shall be compliant with EN 62552.

Ventilation requirements, recess dimensions and minimum rear clearances shall be as stated in this User Manual at Chapter xxx. Please contact the manufacturer for any other further information, including loading plans.

## **CUSTOMER CARE AND SERVICE**

Always use original spare parts.

When contacting our Authorised Service Centre, ensure that you have the following data available: Model, Serial Number and Service Index.

The information can be found on the rating plate. Subject to change without notice.

The original spare parts for some specific components are available for a minimum of 7 or 10 years, based on the type of component, from the placing on the market of the last unit of the model.
